/ PORTFOLIO

/ ABOUT

I am a motivated Software Engineer with experience in SQL, JavaScript, ColdFusion, PHP, jQuery, and Bootstrap. Skilled in using OpenAI and Samsara APIs, I excel in developing dynamic web applications and integrating innovative solutions. I am eager to bring my technical skills and passion for problem-solving to a collaborative team environment.

/ EXPERIENCE

Software Engineer | Smiley Lifting Solutions
2023 - Present

- Configured and optimized web servers using Linux and Apache.
- Integrated advanced APIs such as OpenAI, Google, and Samara.
- Introduced and established best practices for version control with Git and SVN.
- Applied agile methodologies using Asana for project management.
- Architected and developed internal employee platform enhancements using jQuery, Oracle, and ColdFusion.

National Service | Flex Technology Group
2022 - 2023

- Established and maintained SOPs.
- Diagnosed and resolved critical issues within internal software.
- Utilized advanced Excel functions to automate inventory tracking and reporting.

Account Manager | Client Focus
2019 - 2022

- Improved API for seamless client CRM integration.
- Designed and implemented an efficient client onboarding process.
- Worked closely with the Director of IT to identify and resolve software bugs and implement new features.
- Optimized scheduling systems to reduce the number of user interactions required.
